DAILY DESK CARD

One day. One shared book.

BAG is the main unit; KG is optional. Receive → price → sell → recover → share.

Start your desk

Office website → shared mill login → choose your name → your 4-digit PIN. Press **Leave the desk** when finished.

Keep one shared book

Internet is required. If saving is uncertain, check the document list before entering the transaction again.

Who	Do this	Then check
Keeper	Godown stock → receive cloth	Correct mill, product, lot and bag count. Waiting for a rate = not saleable yet.
Bookkeeper	Price received cloth → post	Cost/selling rates checked. Available lot and mill payable updated.
Salesman	Sales bills → New Invoice	Correct buyer, lot, quantity and terms. Posted bill deducts stock automatically.
Salesman / bookkeeper	Buyer ledger → Record Payment	Amount, method and reference. Buyer balance reduced once.
Bookkeeper	Mill accounts / PDC cheques	Record payments separately from buying. Do not record a cheque twice.
Owner / bookkeeper	Returns from original document	Only the unreturned quantity. Direct deal reversal is separate.
Owner / bookkeeper	Evening note → prepare Excel	Review stock/books checks. Prepare a fresh copy after late entries.
Owner	Settings → encrypted backup	Safe destination and separate key. Excel is not a full recovery backup.

Share Excel on a phone

Prepare Excel → Share Excel file → WhatsApp → recipient → Send. If unsupported, download and attach the file.

Share Excel on a PC

Prepare Excel → Download prepared Excel → WhatsApp → **Attach** → **Document** → choose the file → Send.

No second dispatch entry. Sales bills deduct stock. The keeper reports count differences; the owner posts authorised adjustments. Direct deals never enter godown stock.

Help: send screen name, document number, Pakistan time and error text to your support person. Keep passwords/PINs private. Automatic nightly delivery is separate setup.
